An Introduction to Programming with Scratch

July 27-31, 9AM-Noon

Cost $120 For rising 7th-9th grade students

Campers will learn to program through the use of “Scratch,” a user friendly computer language developed by MIT. Animated scenes will be created, as students use programming skills and concepts they learn during the week.

Instructor: Mr. Brian Meermans teaches Advanced Computer Math and AP Computer Science at Battlefield HS (Java and C++). Mr. Meermans also coaches the programming teams at Battlefield, including the Zero Robotics team which was 1st place in the nation in 2013.
